Back the evidence. Keep the resident promise.

60,000 homes.

Safe, resident-accepted handovers.

Real service proof now.

Human and value gates next.

TODAY'S DECISION

Endorse preparation of the next acceptance-and-value proposal.

Planning only - no new spending, rollout or production authority.

Five pressure points. One accepted home.

Choose homes	Assess & design	Prepare funding	Coordinate works	Verify & hand over
Prioritisation	Assessment	Evidence	Delivery	Quality

Safe + resident-accepted + evidence-complete

Measure accepted outcomes, not messages or drafts.

Each request needs rules, people and bounded AI.

Rules

Gates, clocks, eligibility, versions.

People

Policy, consent, professional and financial decisions.

Bounded AI

Reconcile, prepare, draft, flag.

Eight role-agent research instruments — not employee interviews.

Compare routes; keep the exercise choice provisional.

Improve workflow

Least platform change.
Controls still to test.

Greenfield business platform

Managed tools.
New adoption, licensing and support.

Azure-led hybrid

Explicit contracts.
Bespoke engineering and operations.

Recommend hybrid for the bounded exercise only.
Provisional baseline, NOT a customer investment winner.

Equal-control appraisal: slide 22

Change the handoffs, not the whole company.

KEEP

Teams, suppliers,
useful systems.

ADD

One case, owned transitions,
evidence, bounded assistance.

Excel could become reporting after a controlled transition.

Every handoff needs an owner and a next action.

Owner + receiver

Sender chases until accepted.

State

What is actually true now?

Entry, exit, pause

Explicit conditions and holds.

Blocker + next action

Named action and update owner.

Evidence version

Reopen dependent reviews.

Decision + reason

Authority, rationale, history.

Sent ≠ accepted. Completed ≠ handed over.

One home shows the journey we still need to prove.

1 Resolve

Conflicting evidence.

Named resolver.

→

2 Agree

Scope, resident choice,

funding, capacity.

→

3 Deliver

Inspect work.

Return defects.

→

4 Accept

Resident handover.

Finance closes separately.

Hold / return → named, competent human owner

Illustrative exercise journey — not an executed end-to-end customer outcome.

A resident is not a scheduling variable.

Resident

Clear options.
Safe phone, letter or assisted route.
Measure-specific choice.

Delivery

Committed crew, competence, materials and named liaison.

A proposed slot is not consent. Silence/no-access is not refusal.

Human hazard route — never wait for AI.

Show the decision trace, not just an AI explanation.

Know

Source + evidence version + unknowns.

Decide

Rule + result + reviewer + reason.

Change

Authority + dependent re-review + preserved history.

New source ≠ approved new policy.

One API supports the work. People retain authority.

Staff assist residents

HUMAN | requests
Phone/letter/help.
No resident portal.

People own approval

HUMAN | approves
Resident + Finance.
Professionals; QA.

Microsoft Entra ID | CONFIGURED
Microsoft sign-in; role-limited access.

Azure Container Apps

CORE | one workbench + Python API.
Workflow + five assistant modules.

Azure OpenAI

CONDITIONAL | draft only
Scoped request; usage back.
No DB/workflow credentials.

Azure SQL

CORE | records
Proposals / audit

Azure Blob

CONFIGURED
Files; SQL hashes

Runtime detail: slide 19

SQL persistence: recorded technical evidence

Five-assistant authority absent / proactive OFF.
Human and value acceptance outstanding.

Models propose. People and rules control change.

PROPOSAL PATH / recorded operator integration; staff acceptance outstanding

Request → API

Permitted task.

Snapshot → model

Bounded proposal.

Human review

Verify sources first.

SEPARATE CONTROLLED PATH / authority stays with people and rules

Authorized action

Effective authority.

Deterministic gates

Holds + evidence.

SQL + audit

Controlled write.

Model cannot approve, send, book, pay or clear a hold.

Five real proposal paths. No delegated decisions.

Integration and durability observed; usefulness not established.

RECORDED TECHNICAL EVIDENCE

5 distinct proposal paths
5 real calls / 6,884 tokens
15 ledger events
Controlled state unchanged.
Full contents + usage survived restart.

NOT YET ESTABLISHED

Staff browser/API + roles
Human source verification
Semantic correctness + value
Ready = generated, unreviewed.
Acceptance gates outstanding.

Normal five-assistant authority absent. Proactive OFF.

PUBLIC REPOSITORY EVIDENCE | 14 October | image05 / e0254cb3 | revision12

Five assists. One controlled journey.

Workflow controls progression. People retain decisions. | Design + implemented contracts; proactive OFF.

Choose homes	Assess & design	Prepare funding	Coordinate works	Verify & hand over
Assets: policy; data owners: verify	Assessor/coordinator: independent sign-off	Finance: validate, approve, submit	Resident: choice; Programme: release	Independent quality authority: accept
Stock Prioritisation	**Assessment Preparation**	**Grant & Funding Evidence**	**Works & Resident Coordination**	**Quality Evidence Review**
On request	**On request**	**On request**	**On request**	**On request**
Explain facts; query conflicts	Prepare sourced survey/design pack	Draft source-linked evidence pack	Draft update; suggest crew slots	Assemble evidence; raise gaps
Trigger • OFF	**Trigger • OFF**	**Trigger • OFF**	**Trigger • OFF**	**Trigger • OFF**
Missing/conflicting stock facts	Missing/changed survey or design	Missing inputs or changed terms	Unaccepted handoff; overdue update	Missing/conflicting quality evidence

Workflow core: rights • versions • gates • human approvals • audit • retries • manual recovery

Checks OFF now; future eligibility → named human queue. Funding: application ≠ award ≠ claim ≠ cash.

Hazard → human service now, never wait for AI. Value remains a hypothesis.

See cash before optimism.

FICTIONAL EXA-010/015 / not a technology price, award or budget

BEFORE GRANT RECEIPT — **£20,000 gross base cash**

IF RECEIVED

£7,500 fictional grant

→ £12,500 provider base.

IF CONTINGENCY SPENT

£22,000 gross exposure

£14,500 provider exposure.

Application ≠ award ≠ claim ≠ cash.

Make the first change small enough to learn.

Co-design tasks

Programme + workbook owners.

Shadow one-way import

Data owners: reconcile + quarantine.

Supported task walkthroughs

Team leads: help + observe.

Controlled switch and rollback

Digital + work owners: exit tests first.

Proposed owners. No permanent dual entry. No compulsory portal.

Prove the programme. Test the AI separately.

Programme comparison

Matched existing teams.
Frozen cohort; same events.
Accepted handovers +
whole-chain cost.

Paired task comparison

Same inputs: manual/rules
versus assistance.
Quality, net human effort,
latency and cost.

Include unfinished/withdrawn homes. Protect safety, choice, quality, equity + cash.

Earn the next gate; do not repeat the last proof.

1 Confirm

Requirements, owners, authority.

2 Test

Real staff/session, source review, roles, accessibility.

3 Compare

Semantics, net effort, cost, recovery.

4 Decide

Continue, simplify or stop.

Outstanding gates: critical failure -> stop; no AI value -> simplify.

Endorse the next acceptance-and-value proposal.

Endorse preparation of the next acceptance-and-value proposal.

CEO / Assets

Owner: proposed sponsor
Deliverable: accountable owners + scope.

CIO / Programme

Owner: proposed operator
Deliverable: human, access
and recovery evidence.

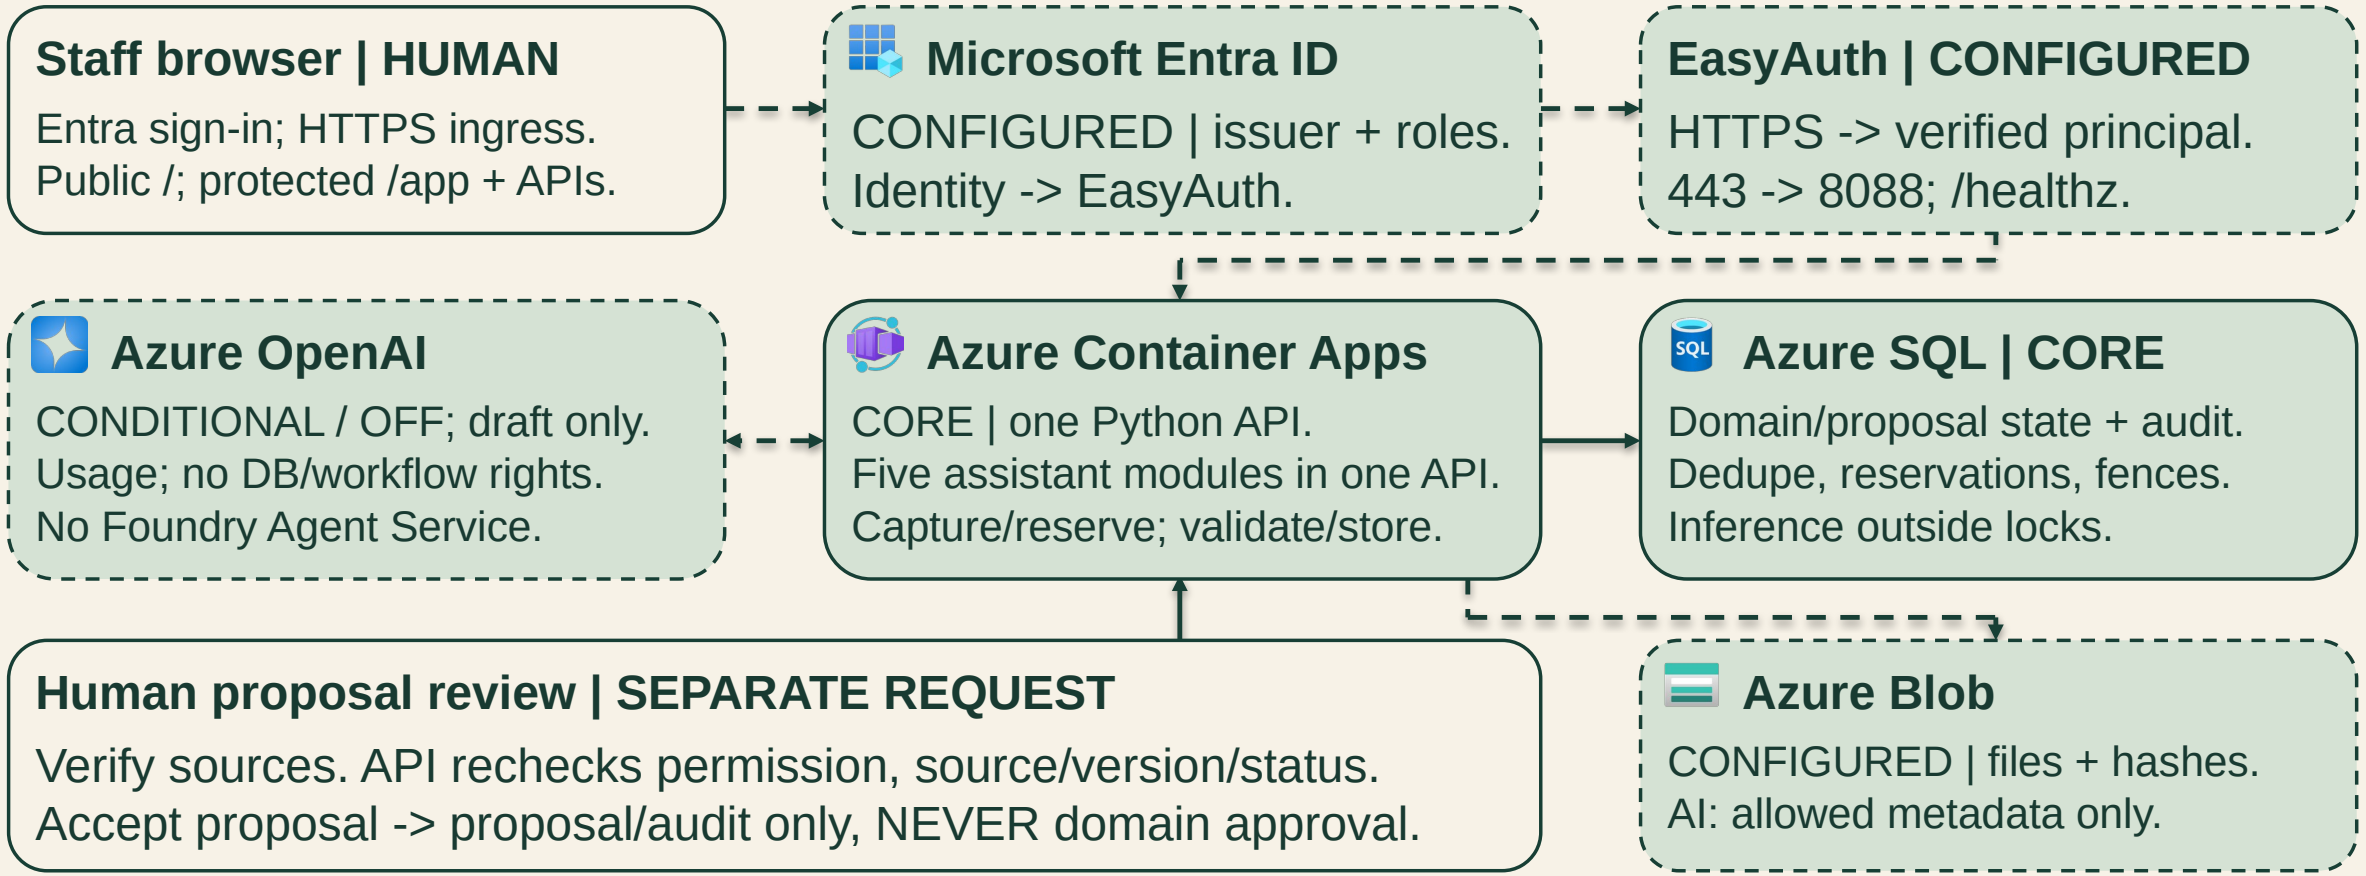

CFO

Owner: proposed reviewer
Deliverable: whole-life cost
- scoped authority review.

Agree owners + return date (to agree). Continue, simplify or stop against pre-agreed tests.

No new spending, procurement, rollout or production authority.

One runtime. Proposals are not domain approvals.

Five-assistant authority absent. Proactive OFF. Controlled approvals stay separate.

Operations: slide 23 **Deferred topology: slide 24** **Return to decision: slide 18**

Council challenge: the objections we welcome.

Why not improve Excel?

Test equal scope and controls.

Why not launch now?

Human, semantic and value acceptance outstanding.

What budget?

No new commitment; whole-life appraisal.

What if AI fails?

Manual workflow remains; simplify.

Unknowns get an owner: runtime19 / options22 / operations23 / deferred24.

Options:22

Return to decision: slide 18

Read the evidence label before the claim.

Request + research

Request ≠ result. Research instruments ≠ residents.

Exercise fixtures

Fixtures ≠ company performance or budgets.

Recorded technical proof

Operator proof ≠ human, semantic or value acceptance.

As at 14 October. Legal currentness not refreshed.

Pitch, rehearsal + thought-leadership evidence outstanding.

Return to decision: slide 18

Compare equivalent routes before selecting a winner.

	Improve current workflow	Greenfield business platform	Azure-led hybrid
Mandatory controls	To verify	To verify	To verify
Transition + access	To test	To test	To test
Support + recovery	To test	To test	To test
Whole-life cost	To price	To price	To price

Equivalent-scope appraisal needed. Exercise preference is NOT customer selection.

Return to options: slide 4

Return to decision: slide 18

Operate the core without overstating assurance.

Azure Blob | auth tokens

CONFIGURED | private store
EasyAuth19 uses SAS.
Renewal gets delegation key.

Azure Container Apps

CONFIGURED | renewal job
03:00 UTC; daily five-day SAS.
Own maintenance identity.

Azure Key Vault

CONFIGURED | one secret
Renewal writes; auth reads.
No browser token retrieval.

Azure Container Registry

CONFIGURED | MI image pull
Operator build + deploy.
CI: tests / scan / SBOM only.

Azure Log Analytics

CONFIGURED | logs + audit
App Insights + SQL/API logs.
Full tracing not established.

Azure Monitor alerts

CONFIGURED | email alerts
80% actual / 100% forecast.
Not a hard spending cap.

SOURCE-CONFIGURED: VNet, subnets, NSGs, private endpoints, DNS, AMPLS.
Development also permits public access. PaaS services are NOT VNet-hosted.

CONFIGURED: API19 -> Graph own-photo User.Read; browser -> tile provider (list alternative).

Model fails: manual work. SQL fails: writes may block. Token renewal fails: act before expiry.

Return to decision: slide 18

Deferred services are not the five-assistant runtime.

DEFERRED ADR 0001 | placeholder contracts, NOT the five-assistant runtime

Orchestrator | DEFERRED

5-minute task placeholder.
Checkpoints -> API19.
Not an AI supervisor.

Azure Queue Storage

DEFERRED | agent-tasks
import-jobs + poison queues.
KEDA tasks / import events.

Agent app | DEFERRED

KEDA placeholder, not current AI.
Context/proposals -> API19.
Models19; no data-store tools.

M365 | CONDITIONAL

SharePoint/Excel snapshot.
Sites.Selected + site grant.
One-way; not photo rights.

Azure Container Apps

DEFERRED | import-jobs stub.
Limited SQL; Blob quarantine.
No workbook write-back.

Azure Blob | DEFERRED

imports / quarantine
exports / audit-archive
Current API + SQL: see19.

Azure Front Door Premium/WAF

NOT DEPLOYED | intended edge; ingress direct.

Audit digest | NOT IMPLEMENTED

Unlocked policy is not immutable anchoring.

CONDITIONAL: ops23 -> Teams Workflows. Never approval, consent or safety response.

Actual runtime: slide 19

Return to decision: slide 18
